----------	---	---------

1) Introduction of the Course: Research methodology and Application of field work helps the students to acquire knowledge about the research and field work help in acquiring different knowledge in fields . The dynamic nature of society makes it challenging to understand to move towards progress and welfare. Social research enables us to analysed social behaviours, understand the course and accelerate its evaluation. Therefore this course will benefit all the student of higher education and also academician.

2) Objectives: The course is an introductory course on how research is actually done with equally importance given to the field work. With emphasise on formulating research design methods of data collection and data analysis, it will provide students with some elementary knowledge on how to conduct both, qualitative and quantitative research.

3) Course Outcome: Students will learn the basic knowledge in collecting primary data through various methods of data collections. The students will acquire knowledge in analytical research report writing and data interpretation. This will help students going for higher studies and also conducting field survey.

4) Evaluation: The registered students will be evaluated through Assignment / field survey (20 Marks). At the end of the course an examination (MCQ) of one hour duration which will carry 30 marks.

5) Feedback: All the registered students will require to give feedback on the course, each relevant and experience. It will be evaluated through structured feedback form.

6) Awarding certificate: Registration for Add-On course is not mandatory. All courses are offered without any additional fee. After successful completion of the course all the qualified students will be provided with certificates.

- I. Classes for an Add-On Course are conducted during the Reserved Time Slot in week days or beyond the regular class hours.
